The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5, 7-8 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Brennan et al. (U.S. patent 6,236,731).

Regarding claims 1, 5 and 7-8, Brennan et al. teaches an apparatus and a method for automatic amplification adjustment in a hearing aid device that comprises transducing (10) an acoustic input signal into an electrical signal, determining a speech signal level and a noise signal level in a plurality of frequency bands (col. 12, lines 26-64 and see figure 1), and determining parameters for automatic adjustment of an amplification of the electrical signal depending on the speech level, the noise signal level and frequency of the electrical signal dynamically (18, 28, 32, col. 10, lines 13-28) as claimed (figure 1).

Regarding claims 2-4, Brennan et al. teaches the determining parameters step that comprises applying a loudness model (the noise signal level), a speech comprehensibility model, and further includes considering the total signal level when performing the automatic adjustment of the amplification (col. 12, lines 26-64 and see the text for figure 1).

Regarding claim 10, Brennan et al. teaches a synthesis device (30) having one or more inputs that is connected respectively to one or more outputs of the parameter determining device as claimed (18, figure 1).

Regarding claim 11, Brennan et al. teaches one or more multipliers (28) as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brennan et al. (U.S. patent 6,236,731).

Regarding claims 6 and 9, Brennan does not specifically teach that the determining of the parameters includes ultilizing individual audiometric data of a hearing aid user. However, Brennan does not restrict to any audio signals or any type of audiometric data in hearing aids.

Therefore, it would have been obvious to one skilled in the art to provide any type of audiometic data for the Brennan system such as an individual audiometric of a hearing aid user for greater application.

Application/Control Number: 10/787,480

Art Unit: 2643

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Holube (U.S. patent 6,198,830) teaches a method and a circuit for the amplification

of input signals of a hearing aid.

Brennan et al. (U.S. patent 6,606,391) teaches a filterbank structure and method for

filtering and separating an information signal into different bands.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to HUYEN D. LE whose telephone number is (703) 305-4844. The

examiner can normally be reached on 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, CURTIS KUNTZ can be reached on (703) 305-4708. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
